

BIM World MUNICH 2018 – 27 – 28 November

BIM World MUNICH contributes to the digital transformation in the construction industry

BIM World MUNICH, the most visited and significant networking platform for Building Information Modeling, is to enter its third round in the International Congress Center Munich (ICM) on November 27th and 28th 2018. More than 120 exhibitors will show different digital trends in building industry and meet around 4.000 expected visitors at the biggest BIM-tradeshow in DAH region. Along with the 2-days international conference and breakout sessions with the leading experts from the construction and real estate industries, BIM Town, the new innovations area, will become a highlight of BIM World MUNICH 2018. Innovative IT and IoT startups have a chance to pitch their smart products and solutions here and win the BIM/Smart Construction Award of the Innovation World Cup® Series. Interested startups can submit their application online: <http://www.innovationworldcup.com/iot-wt/categories/bim-smart-construction-award/>

BIM determines digital future of the building and real estate industries! The Internet of Things has entered the construction industry. National and international key players will speak about modular building, smart IoT buildings, 3D reality capture and demonstrate how their intelligent BIM-solutions and VR/AR-applications help constructors visualize the VR/AR-model of a project they construct to be able to track and improve every flow of the future building. BIMobject, Trimble, Nemetschek Group, BIMwelt Systems, Autodesk, Bentley Systems and others are among them.

The BIM World MUNICH program includes practical insights and unique case studies for professionals in the following areas:

- Digital Facility Management
- BIM in Sustainable Architecture
- BIM in Infrastructure Planning
- BIM for Architects and Engineers,
- BIM and Law
- Industrial Building
- BIM along the Building Life Cycle

Adidas Project of Züblin/Strabag and City of Helsinki (Crown Bridges Project) highlight international best practices, while panel discussion with the renowned participants such as Markus Richthammer, a board member of Max Bögl, Christoph Gröner, CEO of the CG Gruppe, Dr. Jochen Fabritius, Director of Xella International, Mr. Veltkamp from BITKOM and Christophe Sykes, Director of the Construction Products Europe gives insights into the newest digital trends.

The innovations and disruptors of the construction and facility industries are also in the foreground:

- Yoan Lucas Young from Sauerbruch Hutton presents his project „Woodies“, showing

- modular building with BIM
- Christian Scheck from Savills emphasizes the role of BIM in the real estate industry
- the Director of Piepenbrock as well as Y TWO Formative explain the sensors application in buildings, data analysis and Cloud usage

As a central networking platform, BIM World MUNICH cooperates with various national associations and organizations, such as German Construction Industry Association, Bitkom e.V., German Sustainable Building Council, buildingSMART Germany, Leonhard Obermeyer Center (LOC), the research institution of the TU of Munich and Fraunhofer Institute. BIM World has been partnering with the Bavarian Chamber of Architects and the Bavarian Chamber of Engineers from the very beginning and intend to involve new major players worldwide. BIM World builds its network and expands international presence, while cooperating with SwissPropTech, buildingSmart FINLAND, PropTech Norway, czBIM in Czech Republic, BIM Klaster Poland, BIM Association in Slovakia.

The members of czBIM get **25% discount tickets** for the fair and breakout sessions. The e-code for the tickets is **czBIM18** and can be entered here:

The registration goes online here: www.bim-world.de/registration

BIM World MUNICH features digital transformation in the construction industry

Since 2016, BIM World MUNICH has been the most visited and significant networking platform in D-A-CH region that helps national and international key players in the field of digitalization of the construction and real estate industries share their expertise and discover brand-new solutions to their daily challenges. The event takes place annually and consists of a tradeshow with more than 120 exhibitors of innovative BIM-solutions, IT-applications and new IoT-technologies, a 2-days international conference and various breakout sessions with BIM showcase projects. Furthermore, establishing the BIM TOWN in 2018, BIM World opens its doors to the future Innovation Labs of the European Young Entrepreneurs. Interested startups can submit their application online:
